English Proficiency

My main responsibility is building flexible, modular and well tested JavaScript/HTMl/CSS based applications. Some of them require real time communication, so I have the luck to work with various Javascript frameworks. Along with that I'm using node to improve and speed up my workflow. Coding cross-browser web sites, I'm happy to say that I produce responsive apps.

Evoknow (A USA Based Software Firm)   2006 - 2008

Web Developer

As a web developer I had to work as a team member to develop robus web applicatio based on PHP, Javascript, CSS and many other Javascript frameworks along with MVC Framework.

Remarkable Projects

This is the Pay-roll System application in asp.net. Here there are two kinds of customers administration and worker. Employee can only see the information and his transaction per month. Admin can get into worker information, worker wage information, keep information and can also modify and remove those information.Employee can send email to administration using this application, since it is web based application. Since employees have individual name and private password it is properly secured. [ASP.NET Project]

www.deltanettravel.gr : Deltanet is a destionation management website that helps to manage tourist services, in Greece. You can really see different features on this website, so smooth browsing. [Laravel Project, React.Js, Mysql, Git, JIRA]

www.fusioninvoice.com : With FusionInvoice you can launch your own self-hosted invoicing platform that you can use to keep track of your monetary situation within your business, all within a beautiful interface [Laravel Project, JQuery, Ajax., Mysql, Git]
